

Quick overview / Background

Kaiser Permanente VideoConnect is the next generation recruitment solution for instant hiring. The customized product reveals the most convenient and quick way to share information and make prompt hiring decisions.

Requirements

The goal was to create a truly in-person interviewing atmosphere with high quality of audio and video and superior file sharing capabilities.

Solution

Kaiser Permanente VideoConnect was created using the latest developments in Flash and Flex technologies. The solution allows sharing files of different sizes and formats in a quick and easy manner. Chat rooms enable users to organize conference calls and unite people from different places in one room setting. Customization includes adding public or private file sharing options, where files of different formats can be shared, creation of user gallery and conference room settings.
